

Heatavent air warmers

The HAW range

Air warmers are extremely robust heaters designed for a wide variety of industrial applications.

Typical applications are to protect against frost and condensation in areas such as engine rooms, pump rooms, switch gear rooms, drying cabinets and crane cabs.

Air warmers are also used extensively in the marine sector to protect engine and steering systems in ships.

Range features

- Large number of fins give large heating surface.
- Strong, robust and very reliable.
- Now comes complete with guard.

Model HAW1000N
