

PRE9500 Thermal Valve Drive for Wet Radiators

- Silent in operation
- Easy to fit to any suitable valve body
- Normally closed or normally open operation
- Running time for stroke - approx 3 mins
- 200-250v AC
- Low power consumption – 2.5 W
- 250mA max starting current

This extremely useful motorised thermal valve drive enables every room to be controlled automatically at any pre-set temperature. Ideal for schools, colleges, hotels and residential buildings where individual control over separate areas is needed, this maintenance-free unit enables heating to be controlled on an individual room-by-room basis.

For greatest flexibility the PRE9500 should be fitted in conjunction with Prefect “2000 Series” mains signalling system, or with any of the “5” Series of discreet local switches. The unit enables entire radiator systems to be programmed automatically, all from a PC anywhere in the building. So, whichever option you chose, this level of controllability convenience and economy has never been possible before.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? Call us to see how we could help you to cut your energy costs by up to 50%
