

The "komfotherm" natural stone heater

Heat source with natural appeal.

A natural stone heater is a product that can be used both as a booster heater and as a full heating system for a single room or an entire house. The extraordinary aesthetics of the natural stone create a special atmosphere in both cases. The pleasant radiated heat generates little air circulation in the room. The soothing heat radiation means that the room temperature can be kept about 2 °C lower than with air heating systems. Together with a ventilation system with heat recovery, the natural stone heaters meet the [German] Energy Savings Order.

The most important features

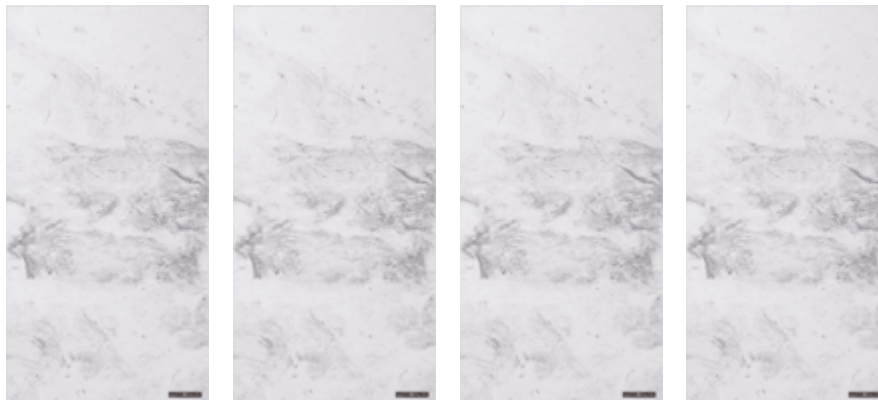

Connected load 0.55/0.90/1.20/1.40/1.60 kW (subject to type)

9 designs available

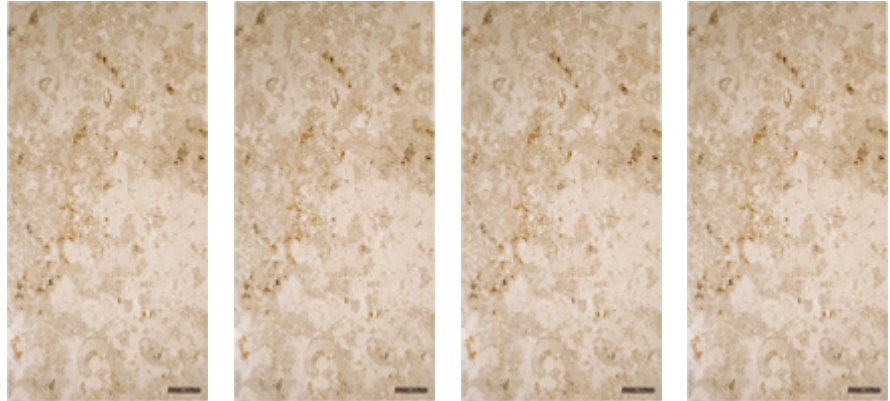

Can be installed as landscape or portrait

Maintenance-free and free from wear and tear

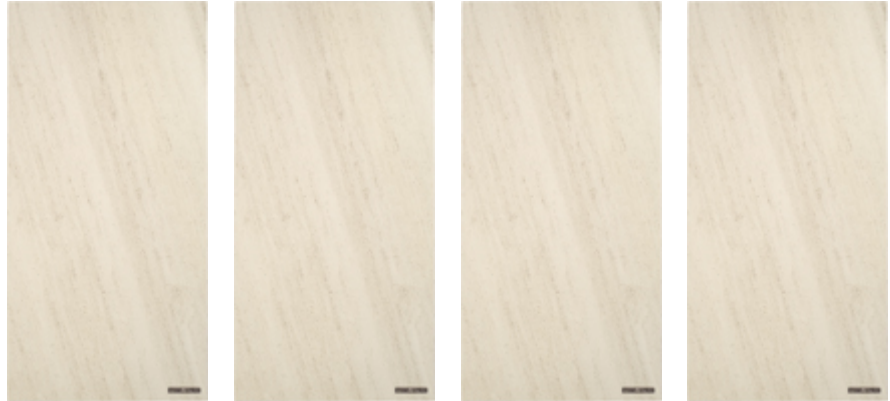

Hoseproof to IP 25

Type				
Type	MHG 55	MHG 90	MHG 120	MHG 140
Part no.	074125	074126	187772	074127
Connection output	0,55 kW	0.9 kW	1.2 kW	1.4 kW
Height	500 mm	500 mm	500 mm	550 mm
