

# Overview

Over-sink instant boiling water heaters

Zip Hydroboil®Plus, Zip Hydroboil®, Zip Econoboil®

**Zip Hydroboil, Zip Hydroboil Plus and Zip Econoboil over-sink instant boiling water heaters are essential appliances for busy kitchens and come in the widest range of models to suit every need.**

## Features

High performance, simplicity, safety and functionality

Zip Hydroboils' patented Twin Chamber Technology and Steam Heat-Boost system is designed to keep the boiling water within one degree of boiling point. This means boiling water, and only boiling water, every time you touch the tap.

\*Standard cup size: 167ml

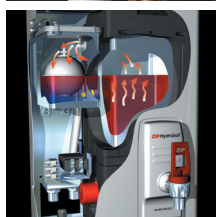

All Zip products have hands-free filling for large pots.

Zip Hydroboil Plus features Cool-Touch tap for precise fingertip control.

Zip's innovative Twin-Chamber Technology and Steam Heat-Boost System keeps boiling water boiling to 1° C of Boiling Point.

Exclusive, energy-efficient insulation panels for minimum heat loss.

### Fail-Safe Thermal Protection System

The system comprises a heavy-duty heating element with an auto-reset cutout. This interrupts the power supply in the event of a boil-dry condition. A thermal cutout on the vent tube also shuts off the power if it senses excessive steam emission and provides maximum safety protection.

### Cool-Touch Safety Tap

The user-friendly two-way Cool-Touch safety tap, exclusive on Zip Hydroboil Plus models up to 7.5 litre capacity, provides fingertip control for filling cups and flips up to a locked 'ON' position for hands-free filling of steaming pots. It also remains cool to the touch and better still it saves energy since the tap does not dissipate heat.

### Patented Twin-Chamber Technology

It is unavoidable that single chamber heaters mix incoming cold water with boiling water which reduces the temperature of the stored water as more water is drawn off. Zip's patented Twin-Chamber Technology keeps the boiling water boiling by separating the incoming cold water from the boiling water, thanks to ZIP's innovative design incorporating its unique Steam Heat Boost System.

### Exclusive Steam Heat-Boost System

Zip's exclusive Steam Heat-Boost System pre-heats the incoming cold water with recycled steam from the boiling water. This dramatically improves thermal efficiency and reduces running costs.

### Unbeatable thermal insulation

The boiling chamber in Zip Hydroboil Plus and Zip Hydroboil is totally encapsulated within a casing of energy efficient, fire retardant, high density insulating foam panels for unsurpassed energy efficiency. Densely compressed high temperature foam panels inside the Zip Hydroboil provide unbeatable thermal insulation.

### Easy Service Access

Zip Hydroboil Plus and Zip Hydroboil water chambers are fabricated from stainless steel to tolerate the effects of scale build-up and are accessible for easy maintenance. The boiling water chamber features both top and bottom access ports giving total access for simple, easy removal of any accumulated sediment or mineral scale.

### Great Tasting Water

To experience the best tasting water from Hydroboil we recommend the use of the Zip Inline filter. This will remove bad taste, bad odour and reduce limescale.

### Warranty

Zip Hydroboil Plus and Hydroboil comes with a 2-year warranty on the heater. Zip Econoboil comes with a 1-year warranty.
