

Overview

Under-sink instant boiling water

Zip HydroTap®

Zip HydroTap is the perfect drinking water system for prestige offices

It dispenses boiling and chilled filtered water instantly from a single tap

A touch of the red button provides instant filtered boiling water and the blue button delivers fresh tasting filtered chilled water

Features

Filtered boiling water instantly for tea, coffee, cooking

Filtered chilled drinking water from the same tap

Safety lock provides in-built protection

Everything but the tap is hidden under the work top or sink

No more time wasted waiting for water to boil

No more energy wasted boiling kettles

No more bottled water to buy or store

Can be installed on virtually any work top with the Tap Font (optional extra)

Oversize levers available

01.09.06

Overview

Under-sink instant boiling water

Zip HydroTap®

		Delivery		Recovery		Energy rating (kW @ 230V AC)	Dimensions W x D x H (mm)
		cups-glasses at a time boiling	chilled	cups-glasses/hour boiling	chilled		
Boiling and chilled, filtered							
Zip HydroTap®	BC150/175	24	25	110	140	2.1	500 x 530 x 395
Zip HydroTap®	BC100/125	16	18	80	100	1.8	440 x 495 x 337
Boiling only, filtered							
Zip HydroTap®	B100	16	N/A	80	100	1.5	290 x 320 x 353

Modern design

Zip HydroTap fits elegantly — only the tap is visible. The boiling and chilling units are hidden under the bench top or sink

Better tasting drinks

Zip HydroTap means fresher, better tasting hot and cold beverages. The triple action water filtration system filters out dirt, rust and particulates that contaminate drinking water

Moreover, it also filters out asbestos fibres and micro-organisms such as giardia and cryptosporidium so drinking water is not only cleaner, it's healthier too

Replacement filtration cartridges are fully encapsulated to make filter changing quick and hygienic and as easy to change as a light bulb without having to shut-off the water supply. A filter replacement light indicates when the filter needs replacing

Designed with safety in mind

Zip HydroTap is so much safer than kettles. Having the convenience of instant boiling water always on tap means there's no longer any worry about health and safety issues associated with overturned kettles or trailing leads

For added safety, a child-proof safety lock prevents accidental use. Once the safety lock is set to 'ON', access to boiling water requires thumb and finger adult operation

For even more security in critical areas an isolating safety-switch is available. In the unlikely event of leakage, the base of the Zip HydroTap undersink unit forms a waterproof safe tray to contain any accidental leakage and a leak detector turns off the entire system

Save energy and money

For instant boiling water, Zip HydroTap is much more energy efficient and cheaper to run than kettles or urns. As for chilled, filtered water, Zip HydroTap means there's never any need to buy bottled water again

Nor is there the worry about lugging heavy water bottles around or finding room to store them all
